

MEMORANDUM

RE: WEBER RIVER PROPOSED DETERMINATION CORRECTIONS:

In the State Engineer's Proposed Determination of Water Rights on the Weber River System, Page 189, No. 566 by George Aldous, it should read T. 6 N., R. 2 E. instead of T. 6 N., R. 1 E. . This is the case for paragraphs (a) to (f) incl.

MEMORANDUM.

RE: WEBER RIVER PROPOSED DETERMINATION CORRECTIONS:

In the State Engineer's Proposed Determination of Water Rights on the Weber River System, Page 28, No. 81, Daniel Lewis, it appears that the water is diverted from Crooked & Seepage Creek at a point 265 ft. S. and 65 ft. N. of the NE Cor. Sec. 32, Twp. 1 S., R. 6 E. into an unnamed ditch, etc. This should be 265 ft. S. and 65 ft. W. of said Cor.

RE: WEBER RIVER PROPOSED DETERMINATION CORRECTIONS:

In the State Engineer's Proposed Determination of Water Rights on the Weber River System, page 123, No. 357, Morgan City Corporation, it would appear that the water should be diverted from Robinson Springs into the Morgan City pipe line instead of the Union Pacific pipe line.

Page 124, No. 359, Joseph M. and James A. Anderson, it is stated, after having been so used the water is returned to the natural channel of the Morgan Irrigation Company ditch. From field examinations relative to this matter it would appear that the certificate No. 1156, in the State Engineer's office and also under the Proposed Determination above referred to, is in error for the reason that the water after having been so used is returned to the Morgan Canning Company ditch or pipe line.
